Tools	: Git, GitHub, Swagger,, Figma, Photoshop, Postman, Vercel, Netlify
Soft Skills	: Team Collaboration, Problem Solving, Continuous Learning

Projects

Aryan - B2B Product Inquiry & Showcase Website

Live Link Client Github Server Github

Customers can browse and filter products across multiple categories with server-side pagination.Each product shows details like fabric, color and production process.The admin dashboard allows full control over products, orders, users and managing SEO. I faced challenges implementing the rich text editor and resolved them using online resources.

- Product Browsing** : Category-based products with filtering and server-side pagination for smooth performance.
- Advanced Admin Dashboard** : Complete product management, banner editing and data analytics with Chart.js visualization.
- Smart Order** : Dynamic order form with Nodemailer integration for instant email notifications and manual order processing.

Technology : ReactJs, NextJs, Tailwind, ExpressJs, MongoDB, Nodemailer, Firebase, React Hook Form

EduSpark - Online Course Management Website

Live Link Client Github Server Github

Students can enroll through a user-friendly interface with secure authentication. Solved Stripe and image hosting issues using online resources; planning to add JWT for better access control.

- User Friendly Interface**: Easy to use and simple design helps everyone find what they want fast. Works smoothly on phones, tablets, and computers.
- Dynamic Dashboard**: Provides separate dashboards for students, teachers and admins each with role-specific features and controls.

Technology : ReactJs,Tailwind,NodeJs, ExpressJs, MongoDB, Firebase, Framer Motion
